Product Integration Supports Delivery Of Loan Closing Products

IN NEWS > RESIDENTIAL MORTGAGE BY MORTGAGEORB.COM ON THURSDAY 03 JUNE 2010

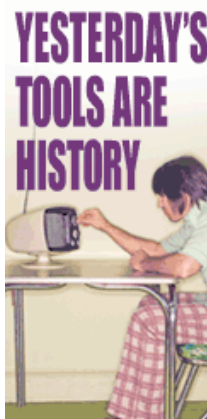

Del Mar DataTrac Inc. (DMD), a provider of lending automation solutions, now offers an integration developed by its document preparation partner, Document Express, that enables DataTrac users to order their initial disclosures, loan closing documents, flood determinations and high-cost loan analysis without leaving the DataTrac screen.

DataTrac clients that use Document Express for document preparation can now order those services via the DMD Vendor Services Platform drop-down menu, the company says. Additionally, the Document Express integration simplifies ordering flood determinations and high-cost analyses for all DataTrac users, including those that use another vendor for doc prep.
